

Back-to-school time is a great reminder for the entire family to visit the dentist!

Children with healthy mouths are ready to learn!

Healthy teeth tips for school-agers:

Brush and floss teeth regularly.

Use a small, soft toothbrush, with a pea- sized amount of paste, to brush teeth after meals and especially before bedtime. If a toothbrush is not available, have your child's rinse their mouth with water.

Supervise brushing.

Closely watch brushing to make sure the child is doing a thorough job and using only a small amount of toothpaste.

Encourage your child to eat nutritious meals and snacks and get plenty of sleep.

The mouth is the opening to the rest of the body and all that enters affects the entire body. Sugary and sticky treats, such as pop and candy provide no nutritious value and can cause cavities. Nutritious foods and plenty of sleep help bodies grow big, strong and ready to learn!

Talk to your dentist, doctor or other healthcare provider about your child's healthy mouth.

It's important for children to see a dentist regularly and before problems arise. If a dentist is not available, encourage your child's healthcare provider to look over your child's teeth for signs of early problems. Your dentist or healthcare provider may also prescribe the use of a fluoride supplement.

This project was supported in part by the following generous funders: Otto Bremer Trust, Delta Dental of Minnesota Foundation, CentraCare Foundation, and Minnesota Dental Foundation
